

Remote Prewire Visit

LSC-PREWIRE-RMTE

A remote session designed to familiarize the electrical contractor with wiring and mounting of system devices, discuss the construction schedule, and review Lutron documentation.

Visit Summary

- A remote session where a Lutron field service engineer reviews the submittal package, particularly the oneline and the device specifications with the electrical contractor, answers questions, and reviews construction timeline along with best practices for installation.
- This session will be delivered using a virtual screen sharing platform in order to review the Lutron submittal package, in particular the one line, product spec sheets and the system layout. It is the responsibility of the electrical contractor to be in a location where they are able to view the screen sharing platform.
- Electrical Contractor will sign off on meeting once complete.
- This visit should not exceed 4 hours.

Additional Information

- Lutron requires 5 business days' notice to schedule a remote session.
- Coordination of required visit attendees, including lighting designer and/or electrical engineer, is the responsibility of the facility representative.
- Quantity dictates the number of sessions purchased.
- This visit may occur after hours at an additional cost.

Note: Lutron does not record the session.
